PRESS RELEASE #6

Turbine Diagnostic Services Inc. is proud to announce that it is breaking ground on its new 10,000 square foot facility in Wesley Chapel Florida. This new facility will house all the field and engineering operations at the same physical location This will enable TDS to better serve its customers through better communications between the field and office personnel. The facility is located next to I-75, the main artery in west-central Florida. TDS will be able to better respond to customer needs for forced outage support due to its accessibility. The facility will feature much improved area for the service and refurbishment of steam and gas turbine components.
